INTERNATIONAL SYMPOSIUM

The Advanced Technologies for
the Valorization and tourism
Development of Cultural and
Natural Heritage in
Risk-Prone Territories

◆ **12-13 MAY 2025**

◆ **Hybrid Mode**

Argument

The Symposium explores the potential of technological advancements for safeguarding and enhancing the tourist appeal of heritage sites situated in high-risk areas. Its primary goal is to develop a research and development strategy through a series of studies, experiments, and interventions.

This event aligns with the commemoration of Heritage Month, organized by Algeria's Ministry of Culture and Arts (April 18 - May 18, 2024), under the theme "Cultural Heritage and Risk Management." The Symposium also coincides with the 2024 edition of the International Day for Monuments and Sites, organized by ICOMOS under the theme "Disasters and Conflicts Through the Prism of the Venice Charter."

CRAT envisions this Symposium as a platform for reflection on the challenges of preserving cultural diversity and biodiversity, closely linked to territorial planning.

The objective is to leverage advanced technologies to explore innovative research pathways that can support the creation of an integrated strategy for preserving, enhancing, and promoting cultural and natural areas for tourism. This approach seeks to balance heritage valorization, territorial planning innovation, and sustainable tourism development in risk-prone environments.
